

I KATEDRA i KLINIKA KARDIOLOGII
WARSZAWSKIEGO UNIWERSYTETU MEDYCZNEGO

ECG Quiz

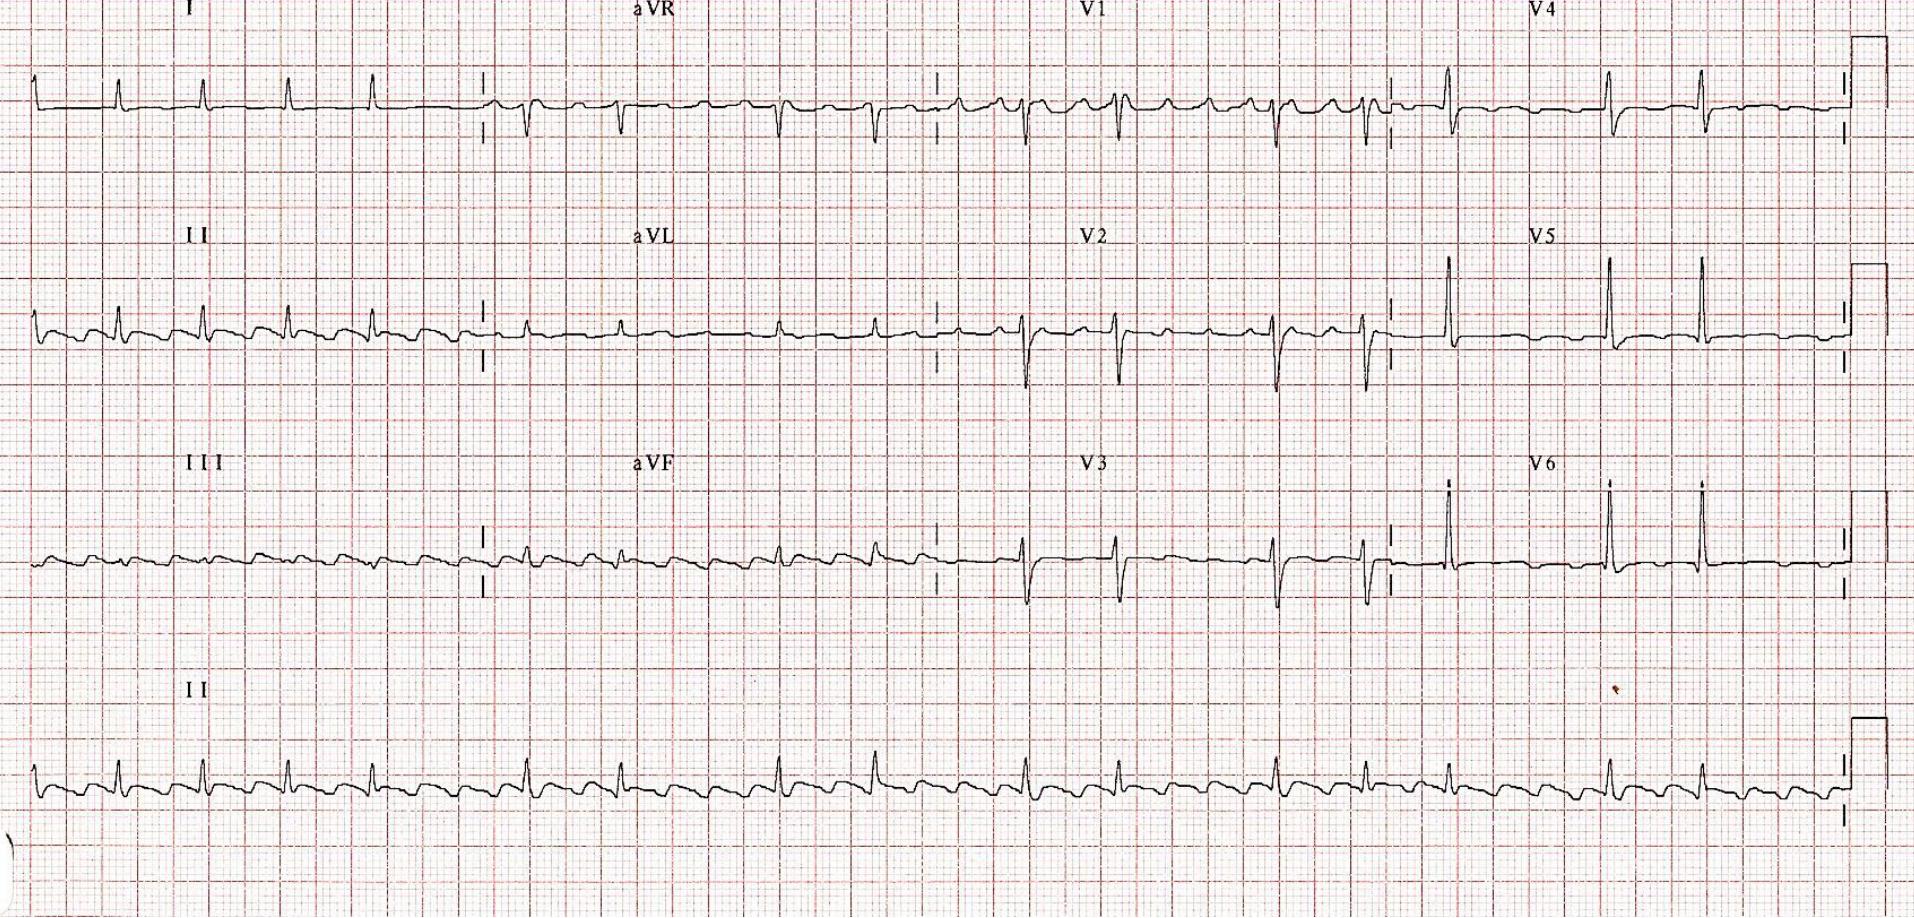

Ewa Szczerba, MD
Michał Peller, MD

1.1. What is the heart rhythm?

- A. Sinus rhythm
- B. Atrial fibrillation
- C. Atrial flutter
- D. Nodal rhythm

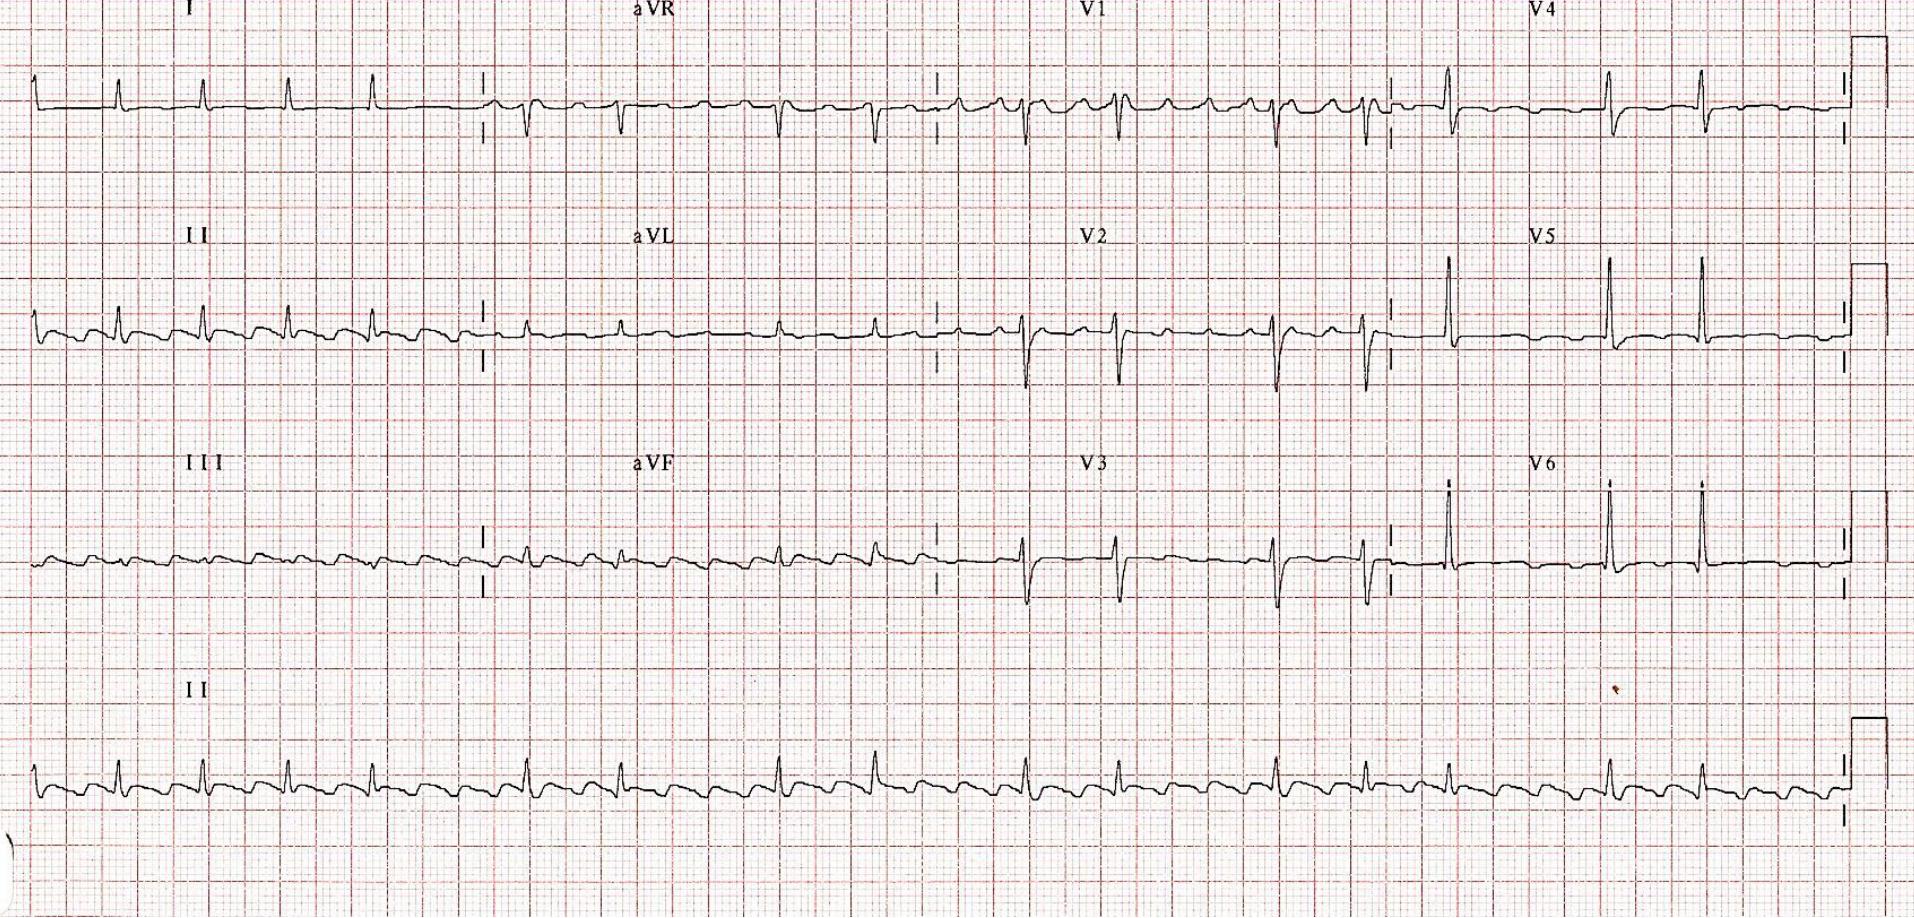

1.2. What is the heart rate?

- A. Regular 120 bpm
- B. Regular 75 bpm
- C. Irregular about 100 bpm
- D. Irregular about 200 bpm

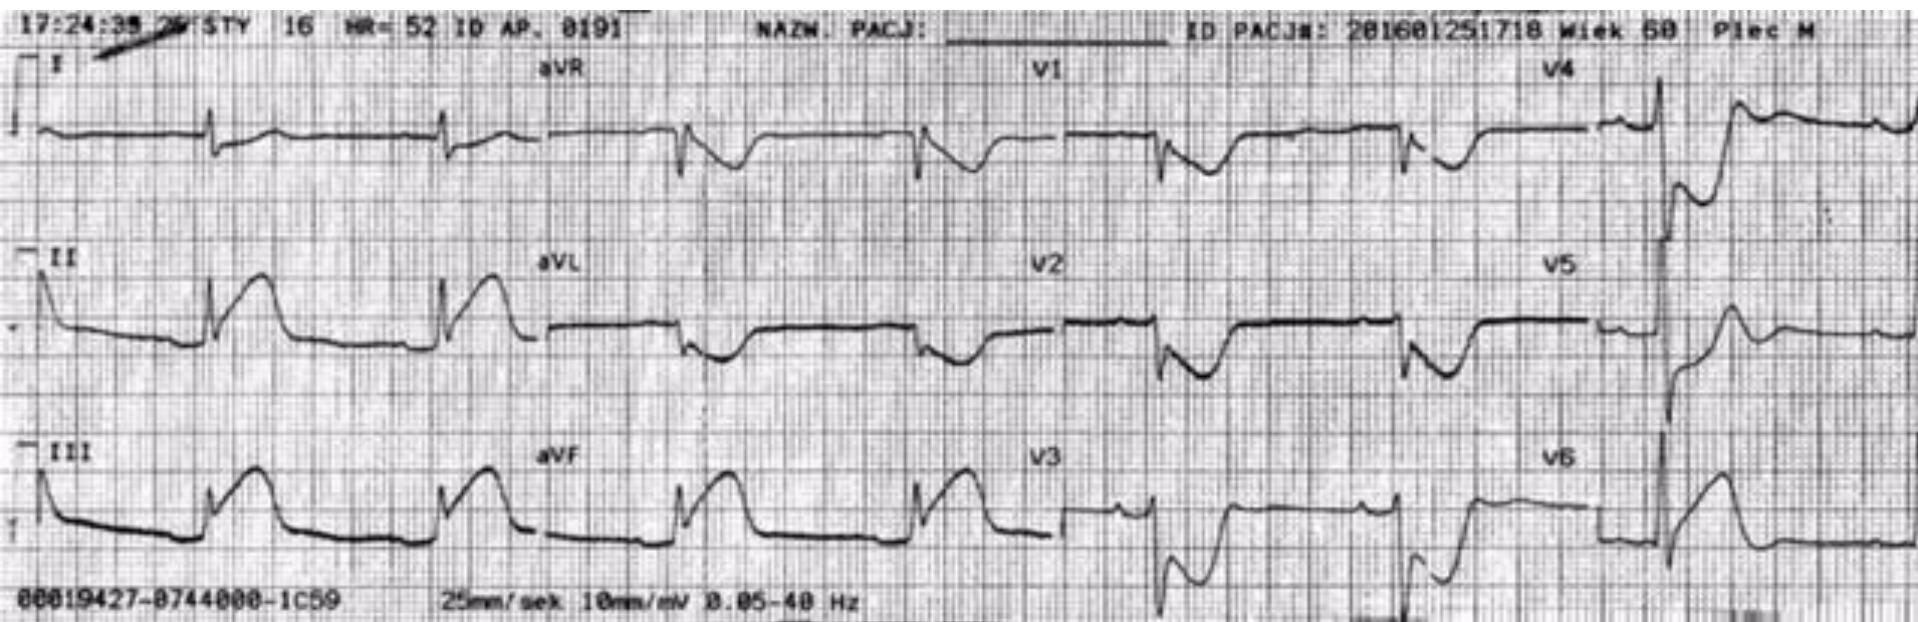

1.3. What is the most effective way to terminate this arrhythmia?

- A. Beta-blockers
- B. Amiodarone
- C. Electrical cardioversion
- D. Defibillation

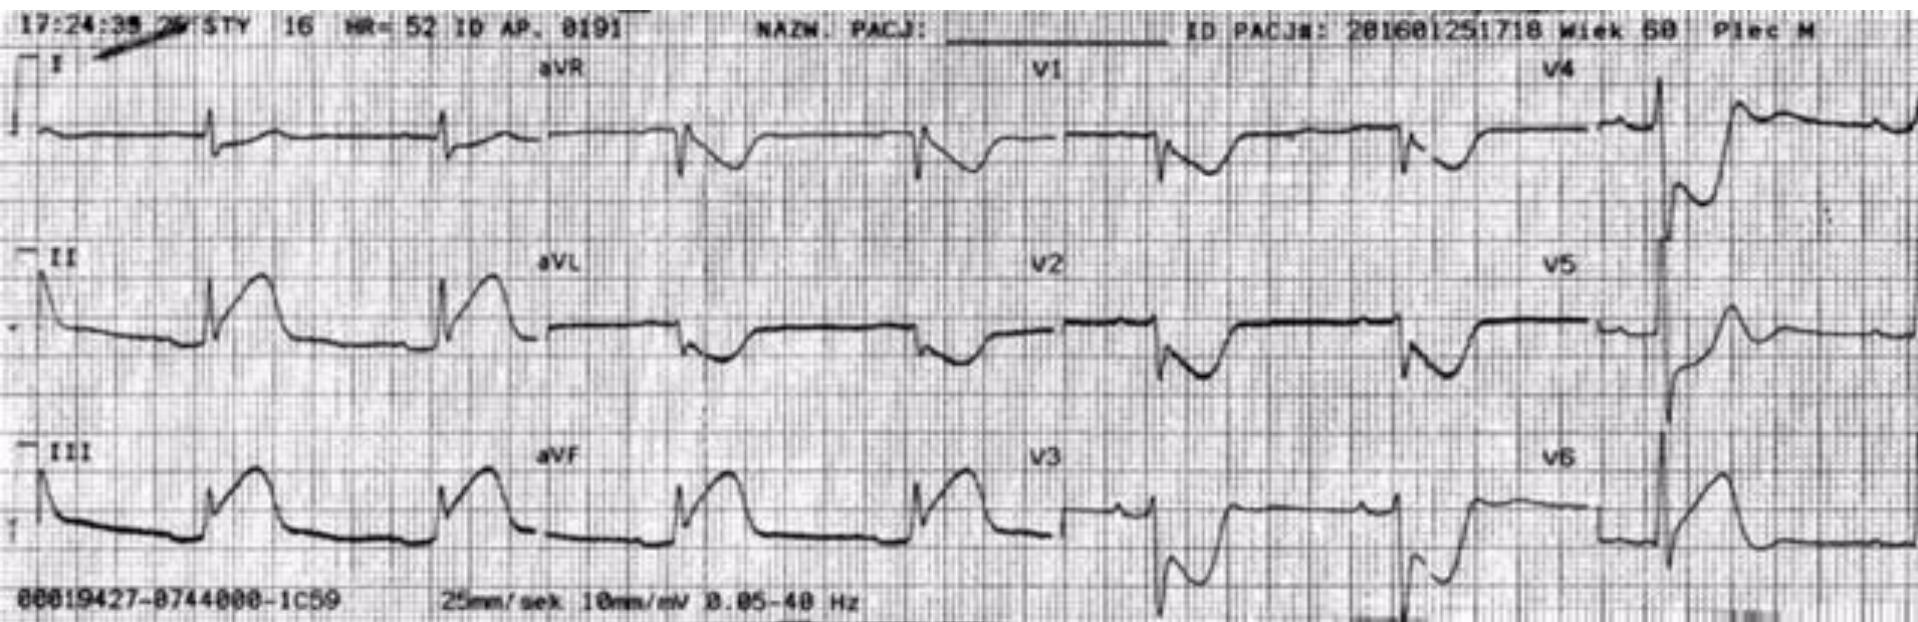

2.1. What is the heart rhythm?

- A. Sinus rhythm
- B. Atrial fibrillation
- C. Ventricular rhythm
- D. Nodal rhythm

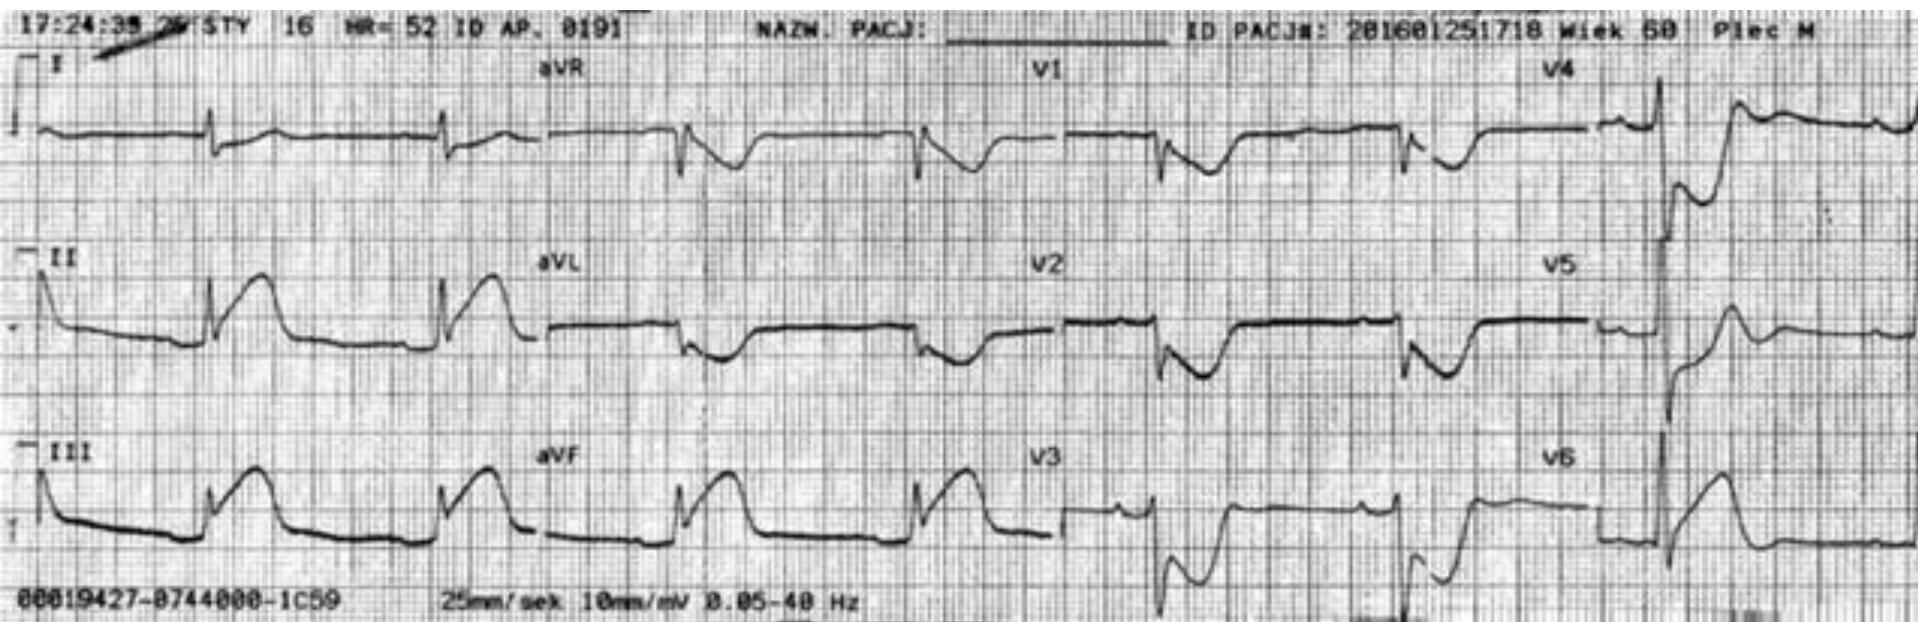

2.2. Are there any signs of heart ischemia?

- A. No, there is no ischemia
- B. Yes, signs of ischemia in the past
- C. Yes, signs of acute ischemia
- D. Because of LBBB it is hard to assess signs of ischemia

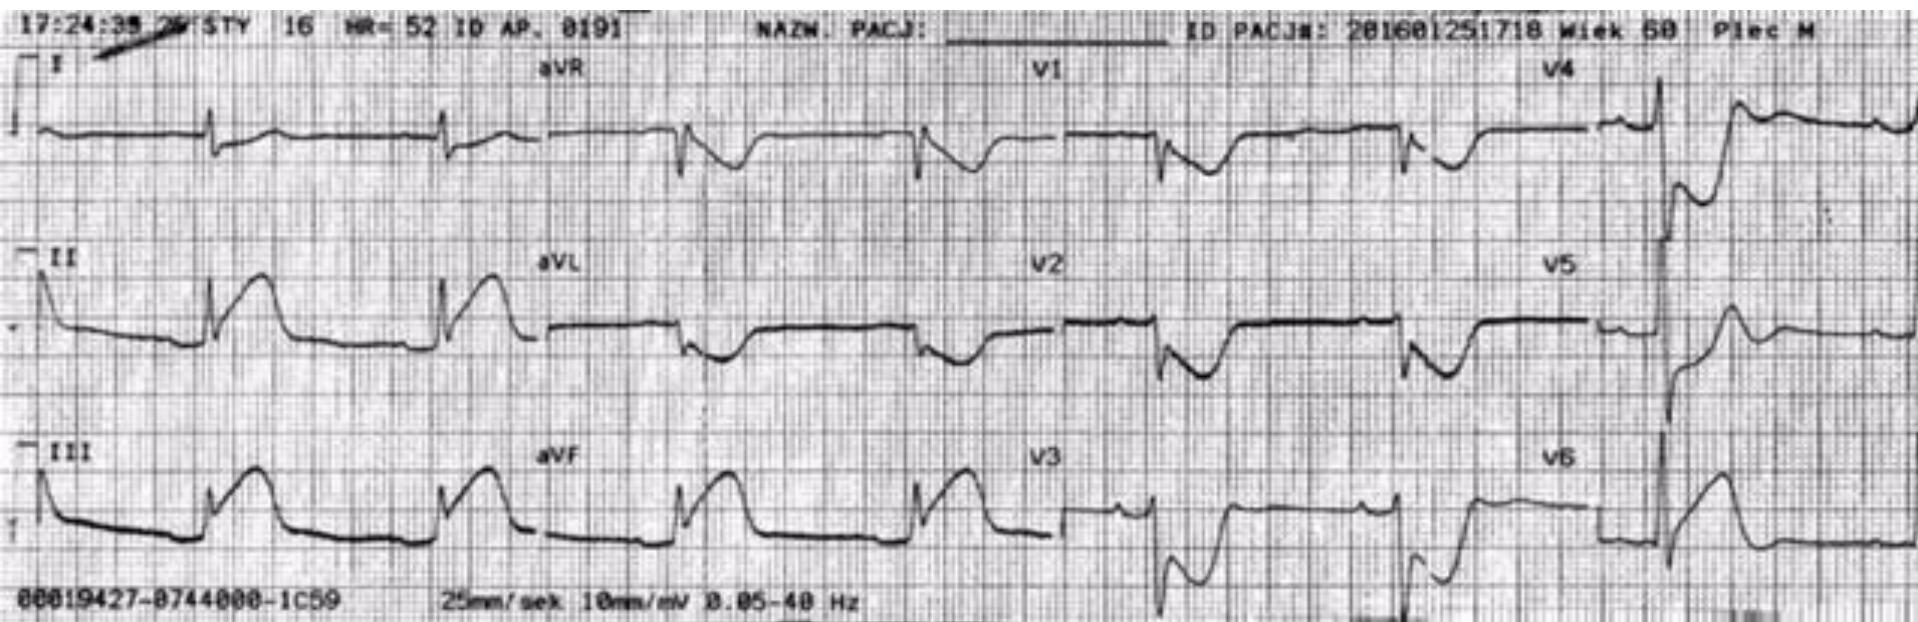

2.3. What is the most probable diagnosis?

- A. STEMI
- B. NSTEMI
- C. Stable coronary disease
- D. Myocarditis

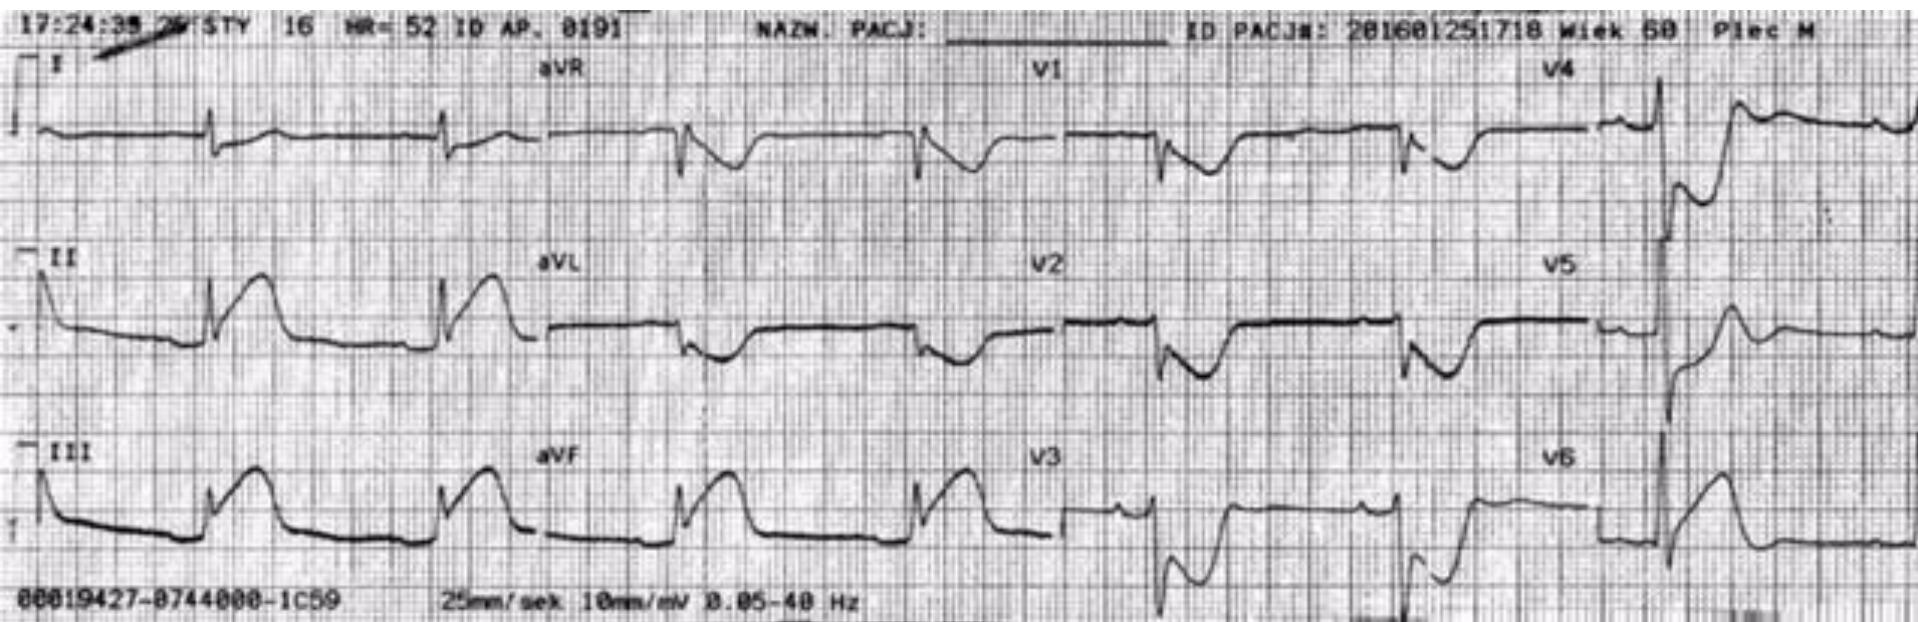

2.4. Where is the ischemia located?

- A. Anterior wall
- B. Inferior wall
- C. Inferior and infero-lateral wall
- D. Antero-lateral wall

2.5. Where is the most important part of treatment?

- A. Reperfusion
- B. Nitrates
- C. Amiodarone
- D. Defibrillation

3.1. What is the heart rhythm?

- A. Sinus rhythm
- B. Atrial flutter
- C. Ventricular tachycardia
- D. Atrioventricular nodal reentry tachycardia

3.2. What is the electrical axis of the heart?

- A. Normal
- B. Left
- C. Right
- D. Undetermined

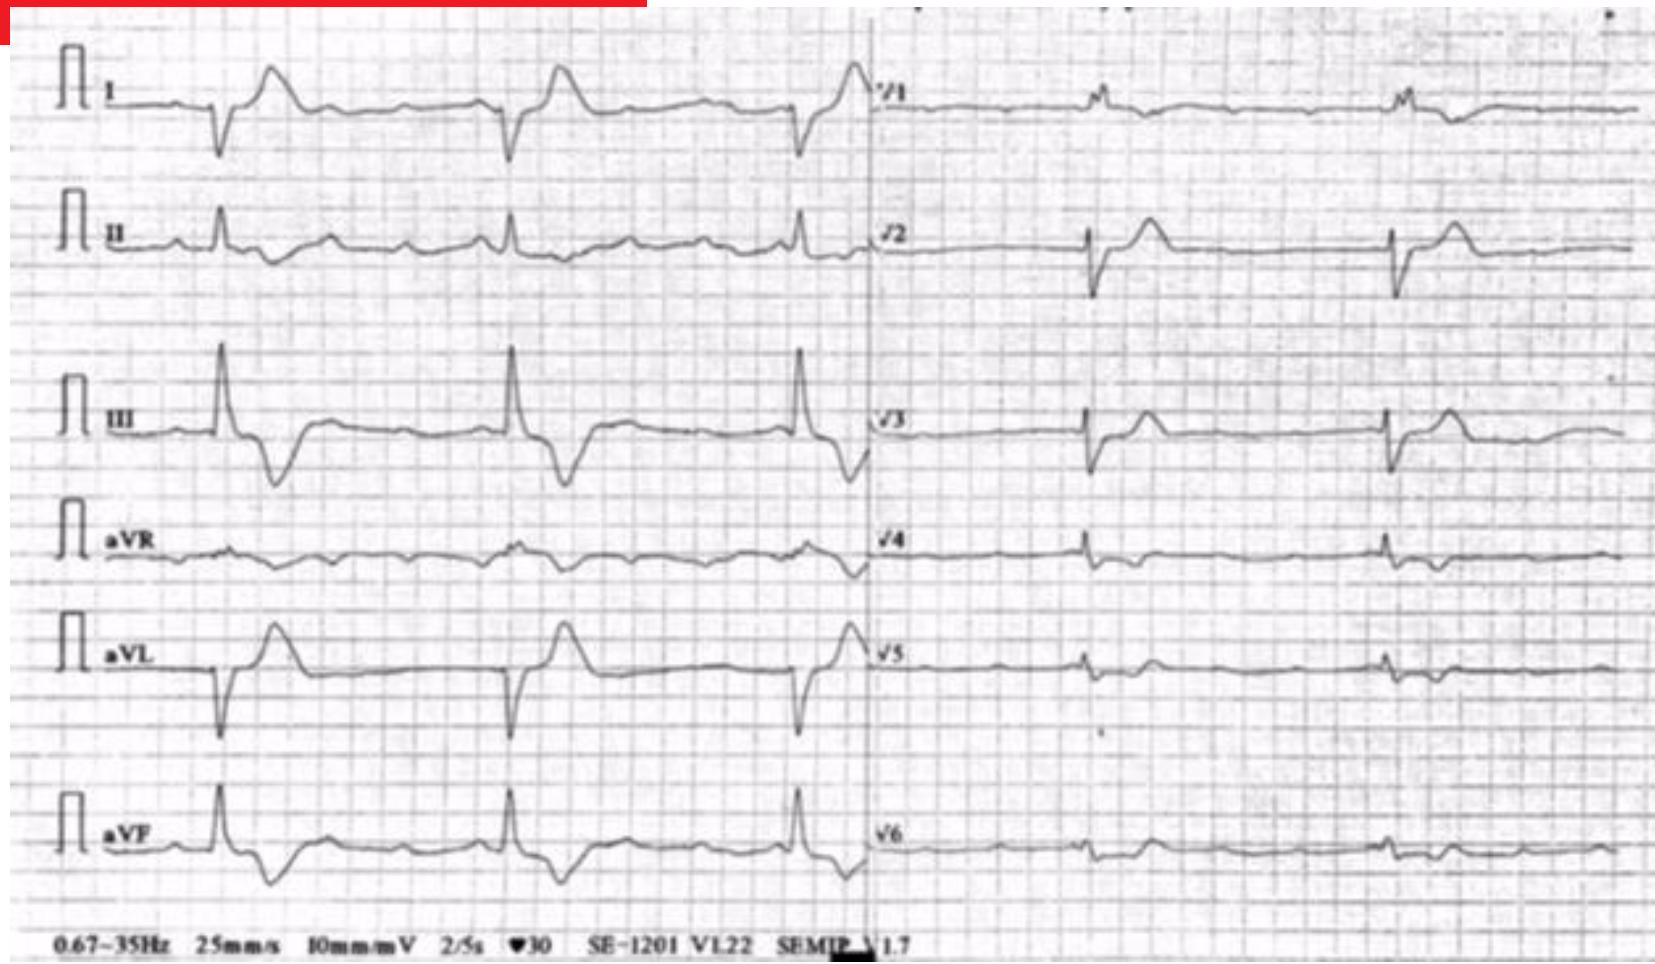

3.3. What is the first line of treatment (for stable patients)?

- A. Beta-blocker
- B. Amiodarone
- C. Adenosine
- D. Atropine

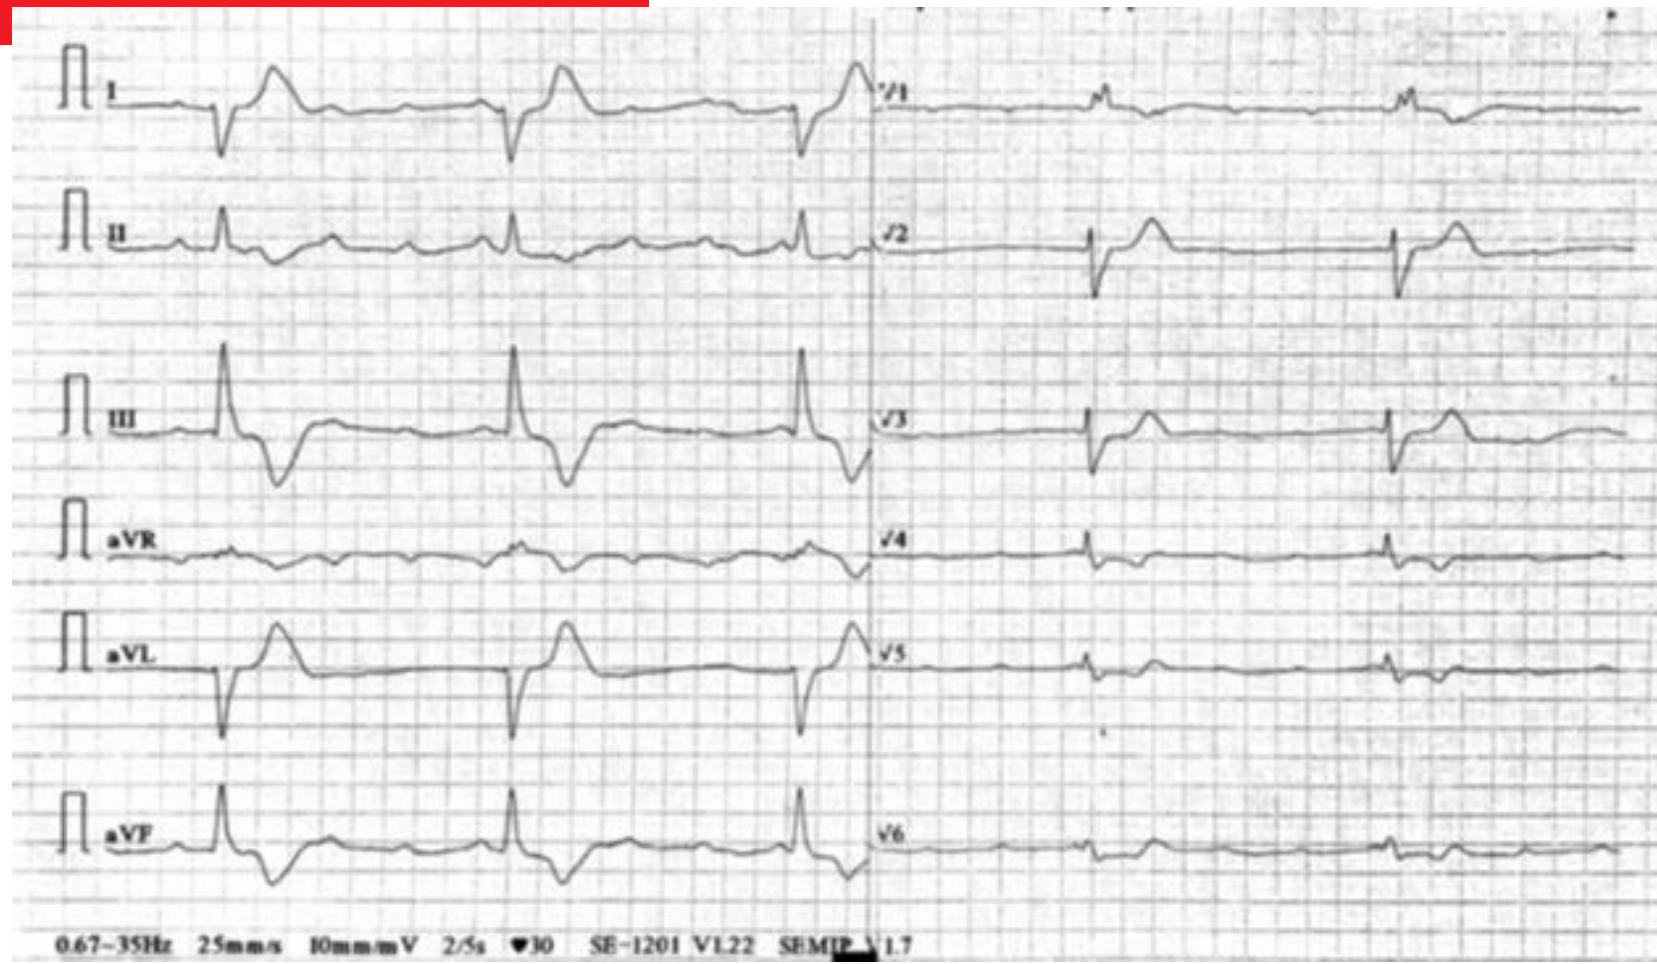

4.1. What is the heart rhythm?

- A. Sinus rhythm
- B. Atrial flutter
- C. Ventricular tachycardia
- D. Atrial fibrillation

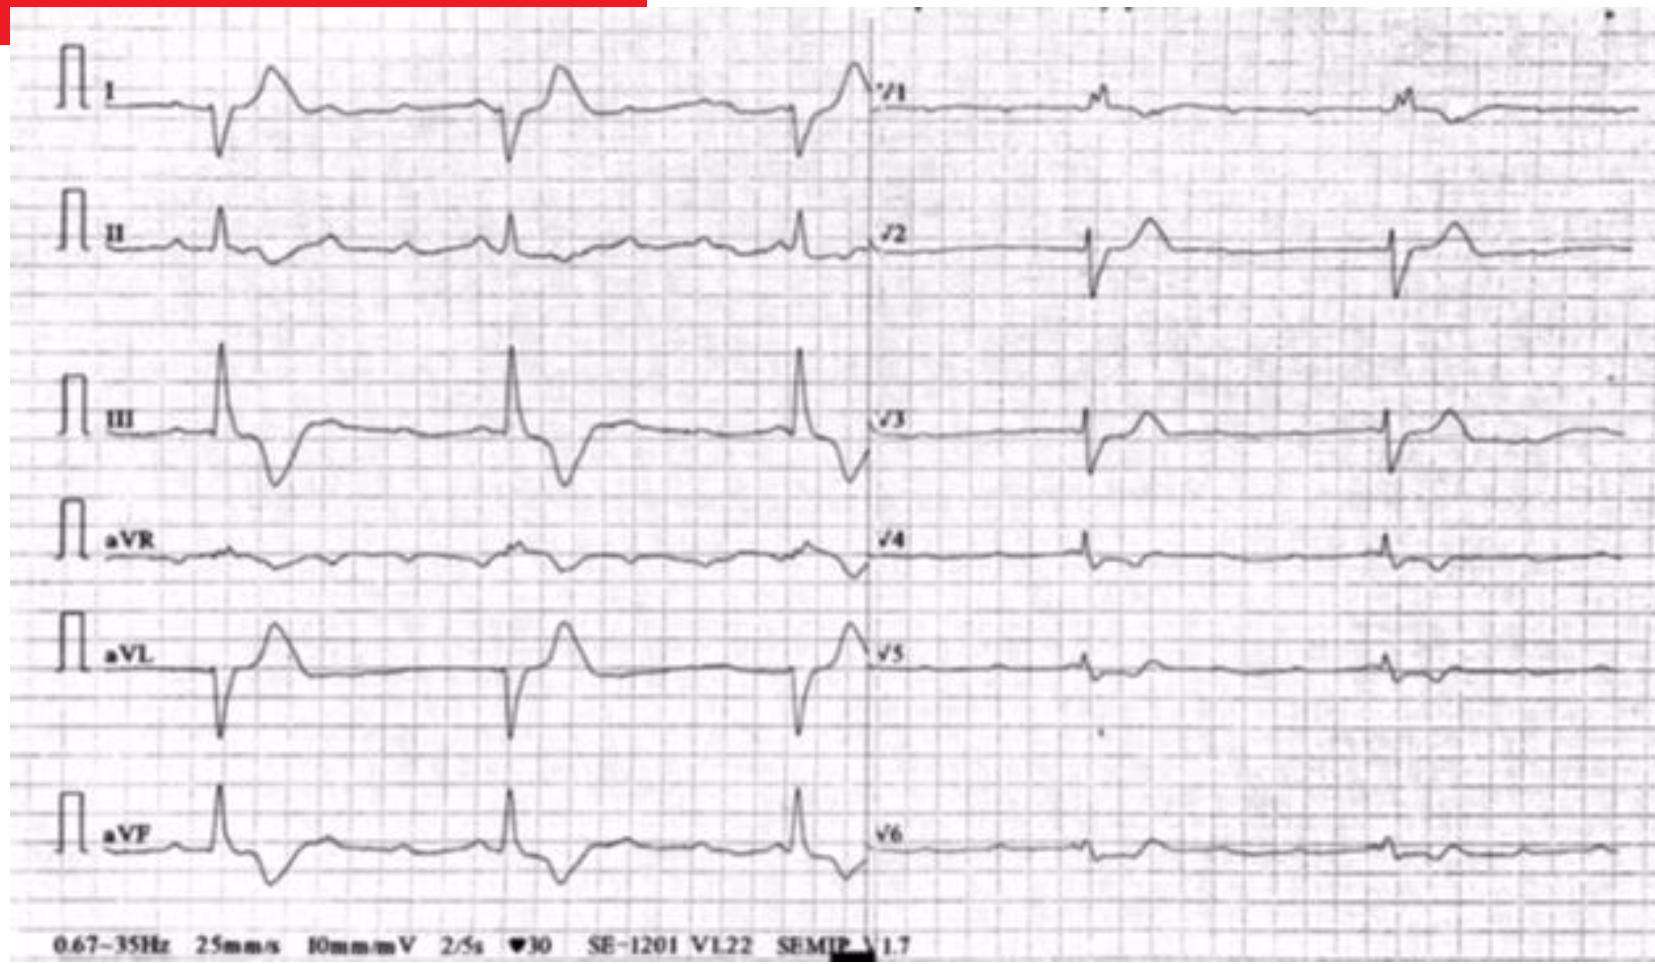

4.2. What degree of AV block is presented?

- A. First degree
- B. Second degree type I
- C. Second degree type II
- D. Third degree

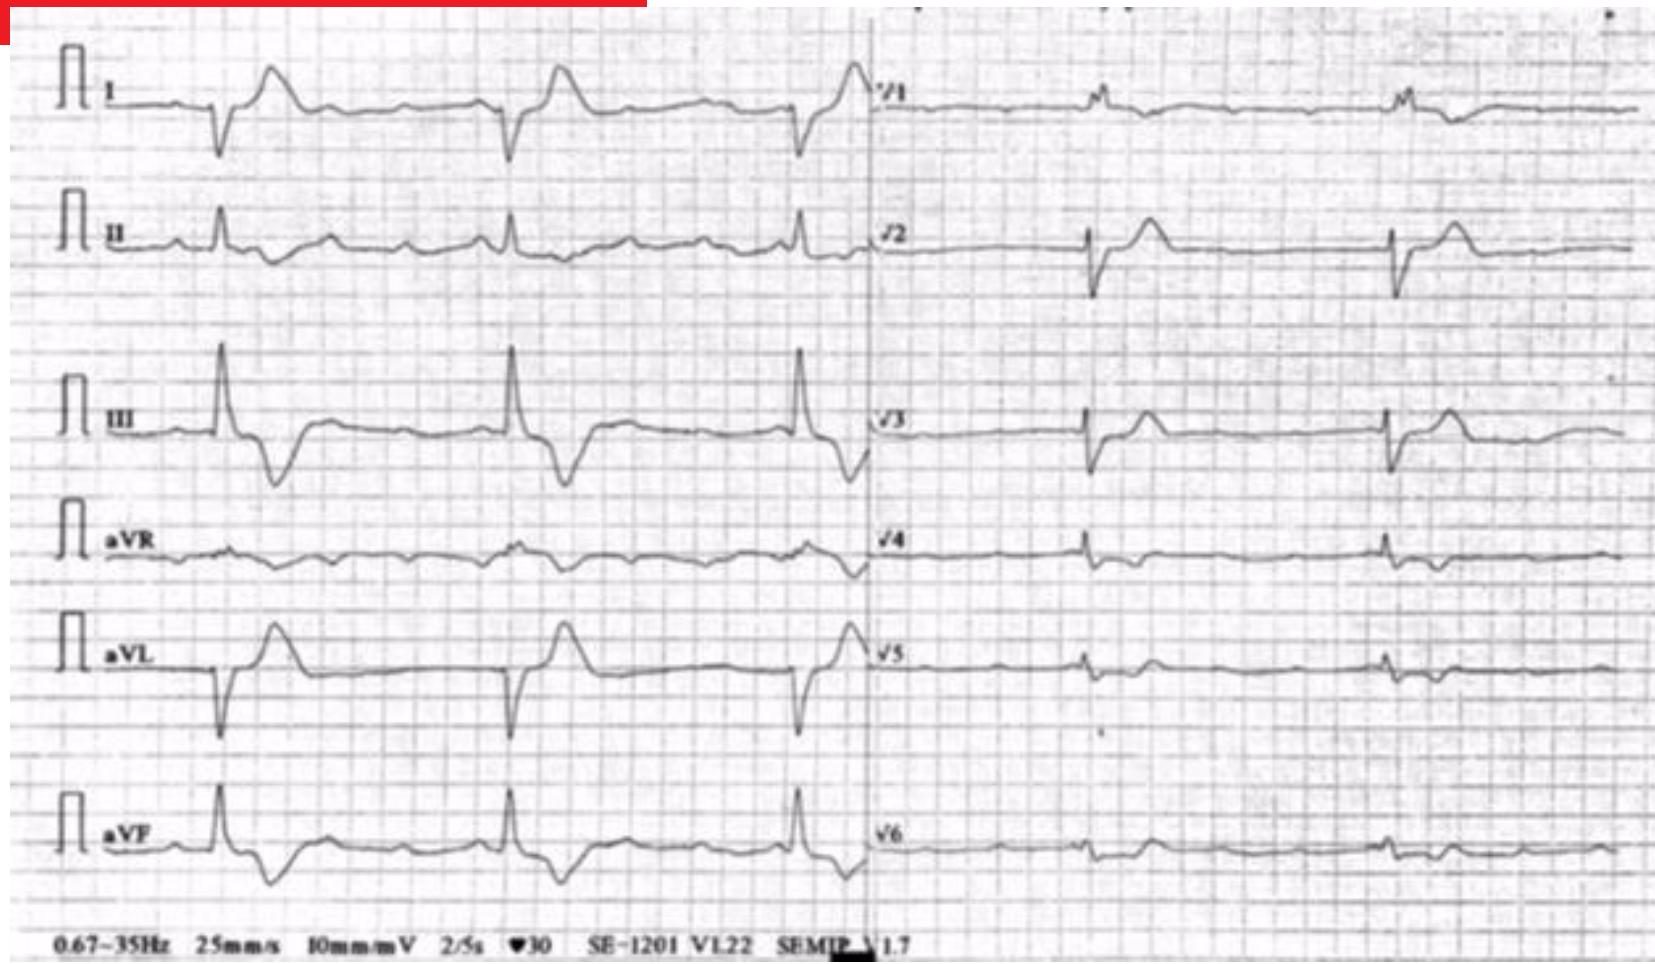

4.3. What is the escape rhythm?

- A. Atrial rhythm
- B. Nodal rhythm
- C. Ventricular rhythm
- D. There is no escape rhythm

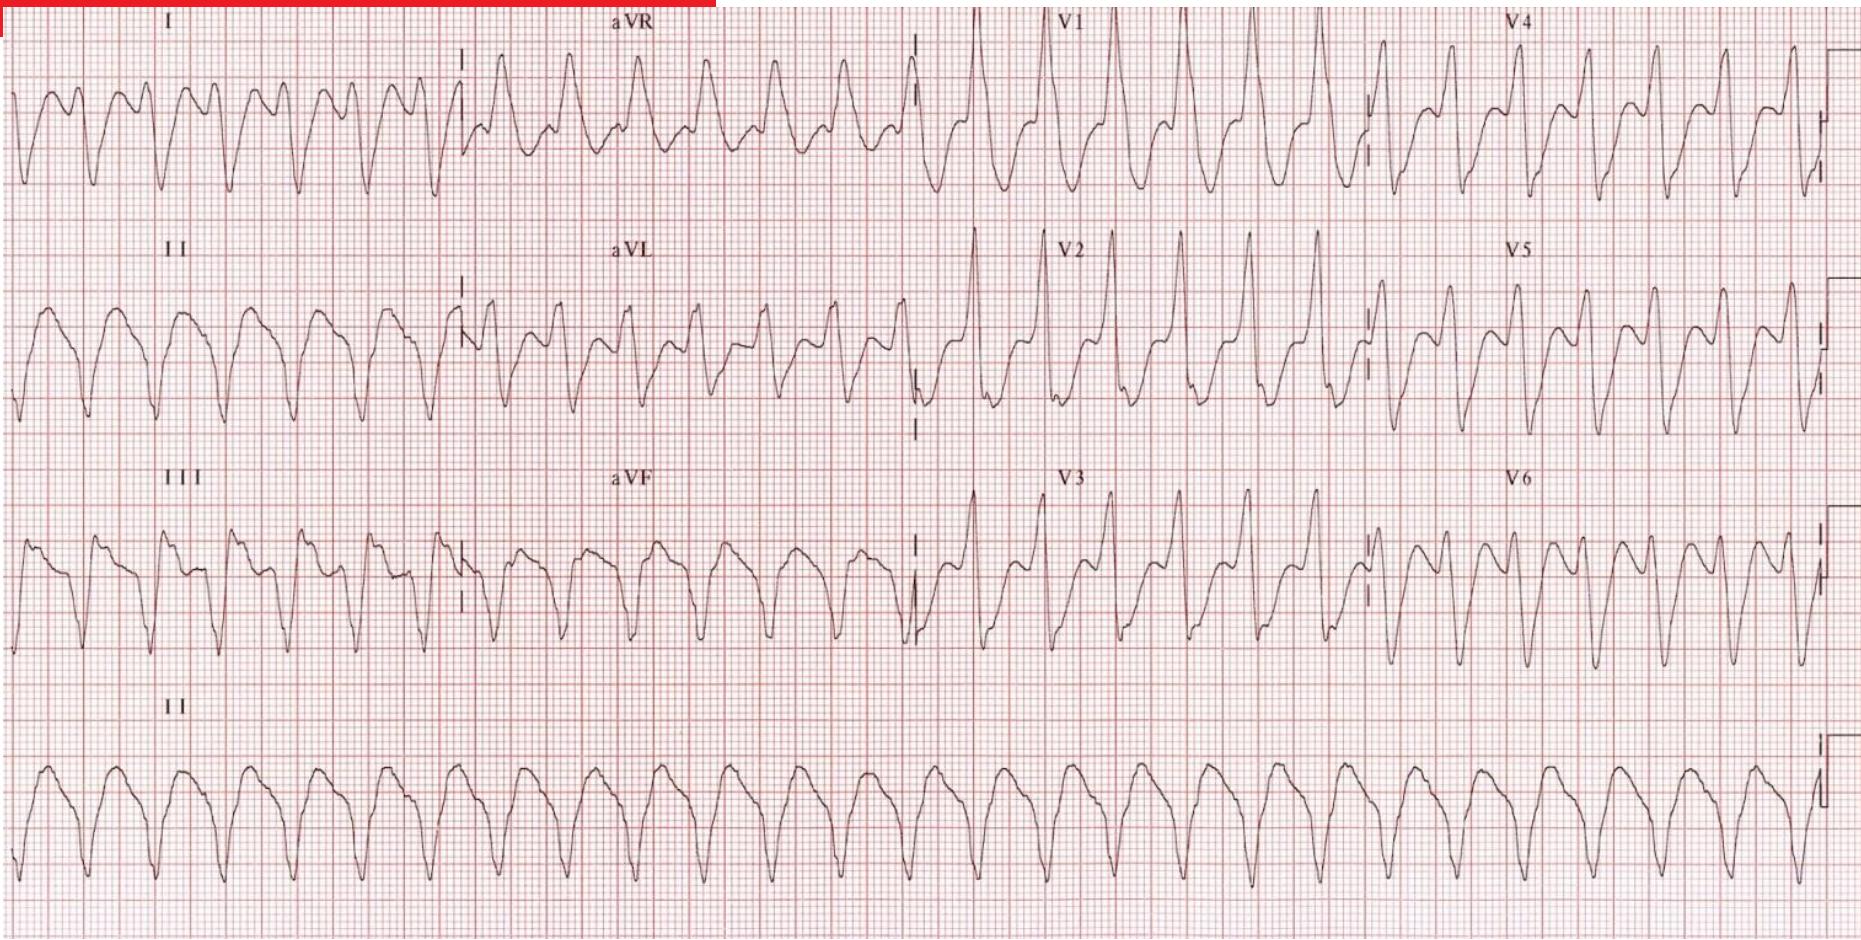

4.4. What is the first line of pharmacological treatment?

- A. Beta-blocker
- B. Amiodarone
- C. Adenosine
- D. Atropine

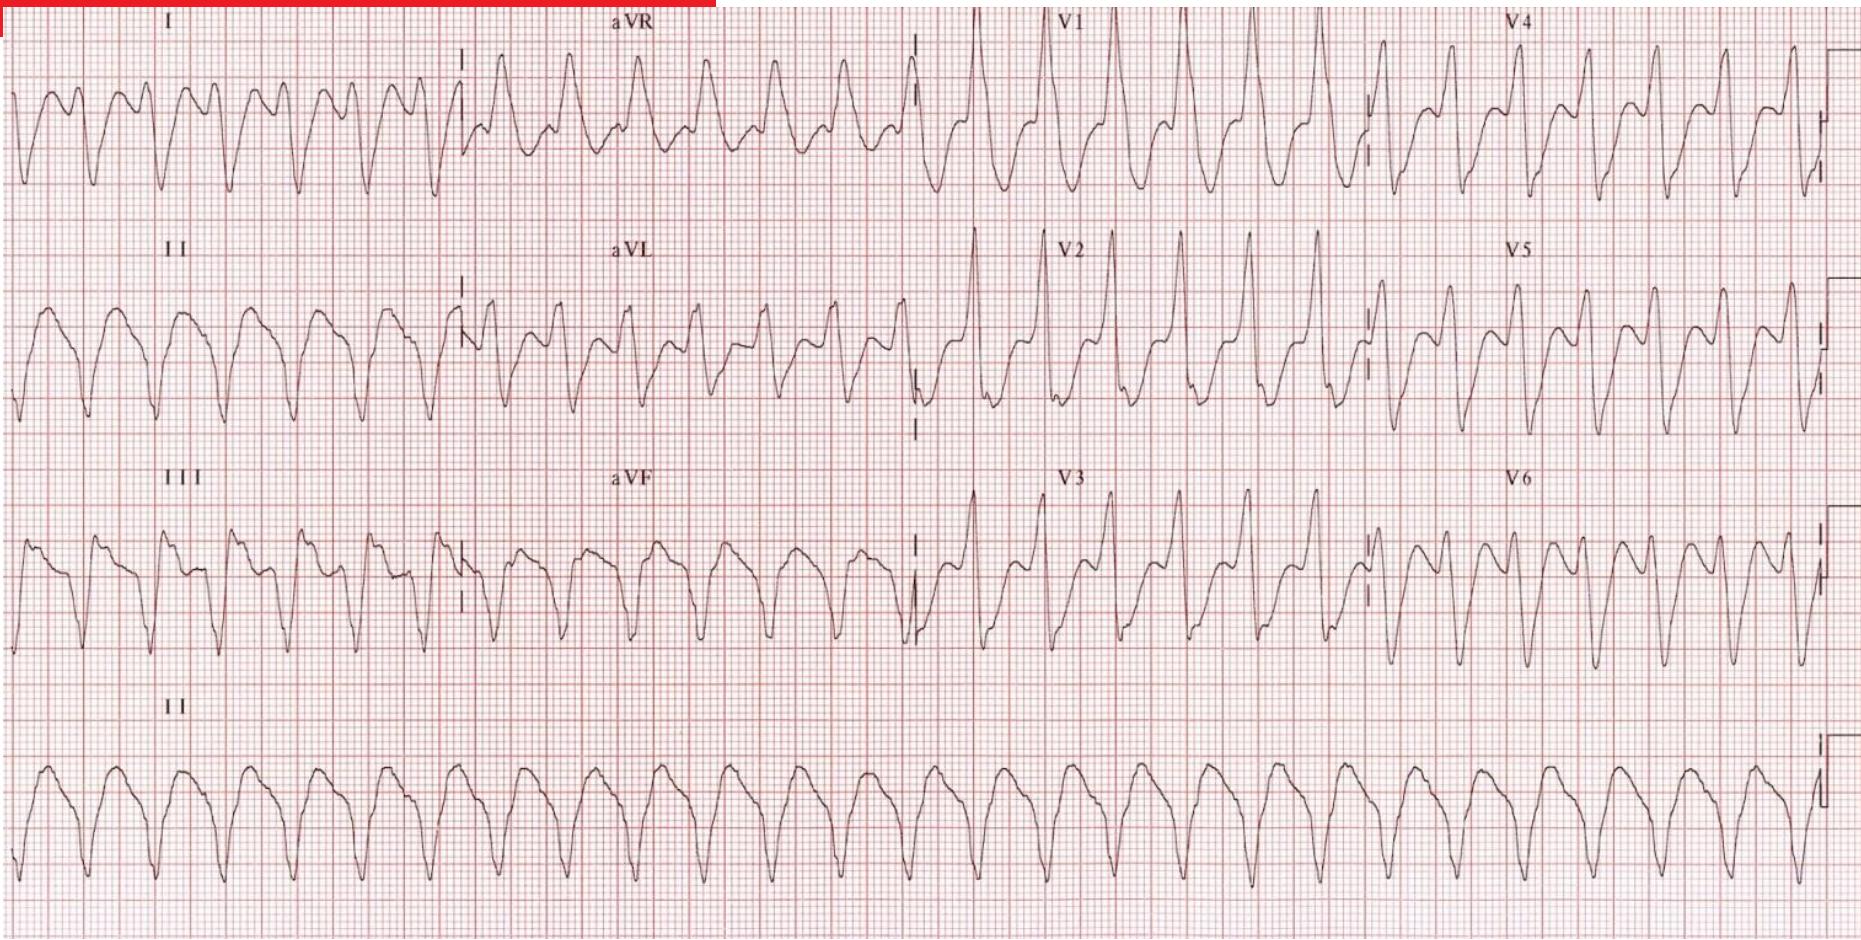

5.1. What is the heart rhythm?

- A. Sinus rhythm
- B. Atrial flutter
- C. Ventricular tachycardia
- D. Atrial fibrillation

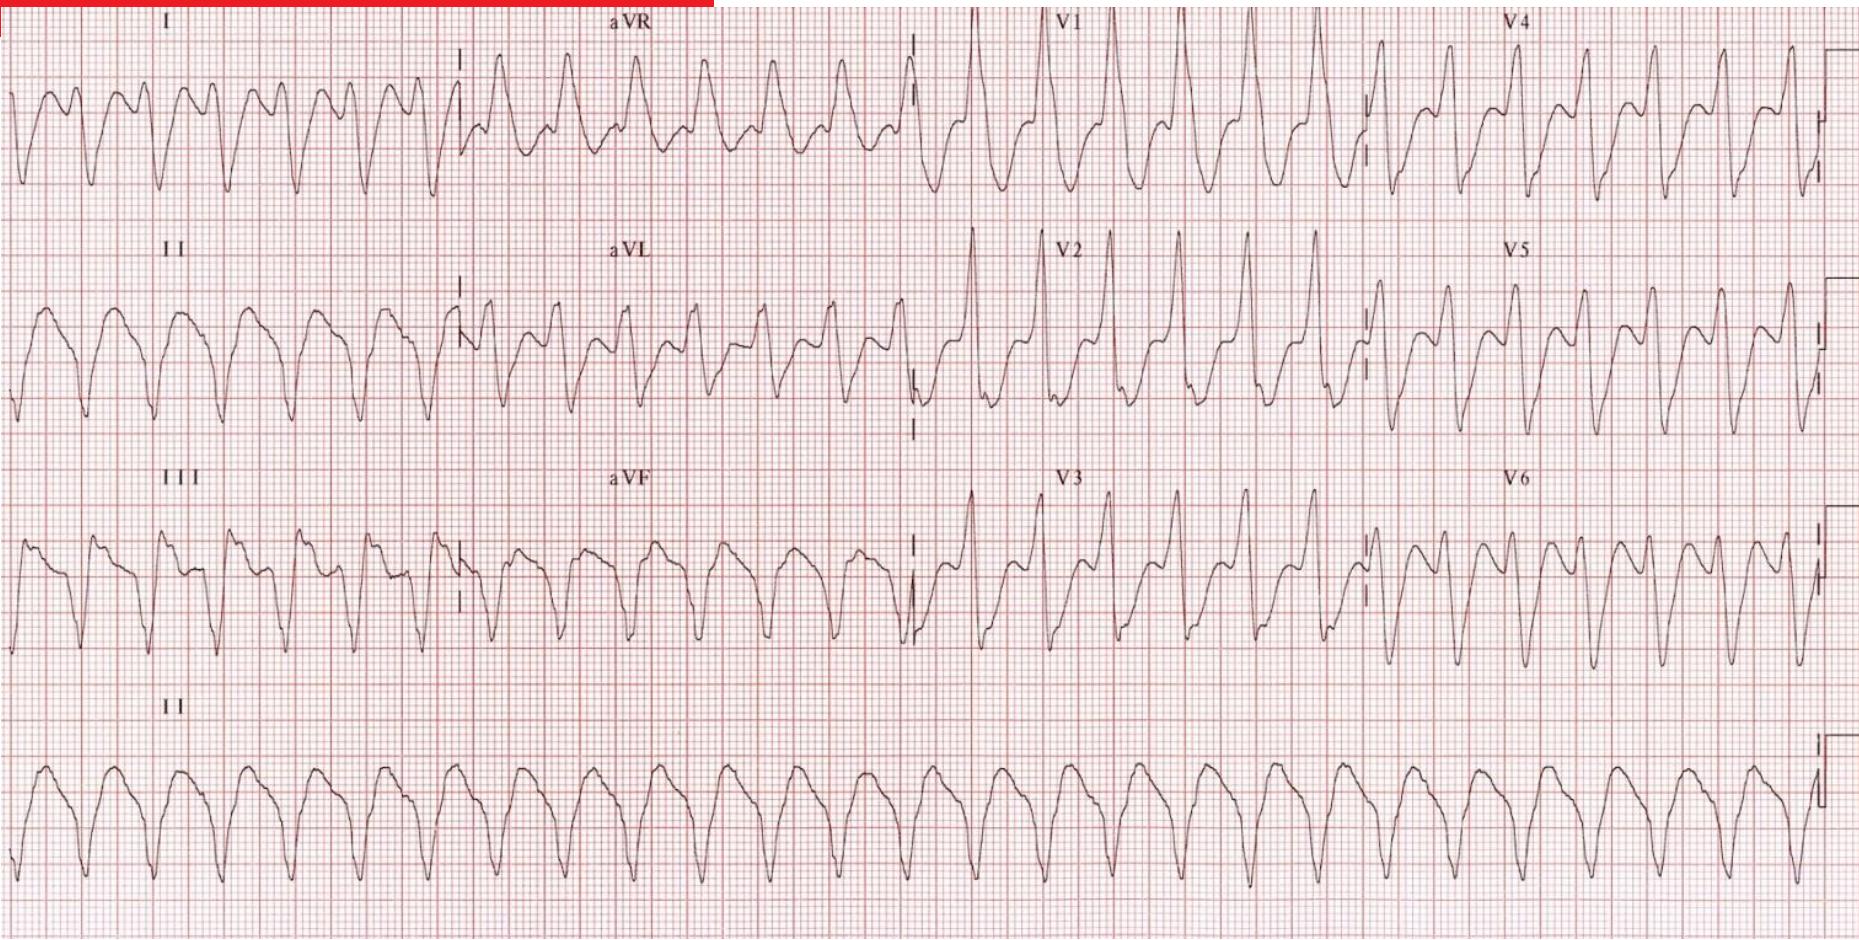

5.2. What is the heart rate (25mm/s)?

- A. 50 bpm
- B. 100 bpm
- C. 150 bpm
- D. 300 bpm

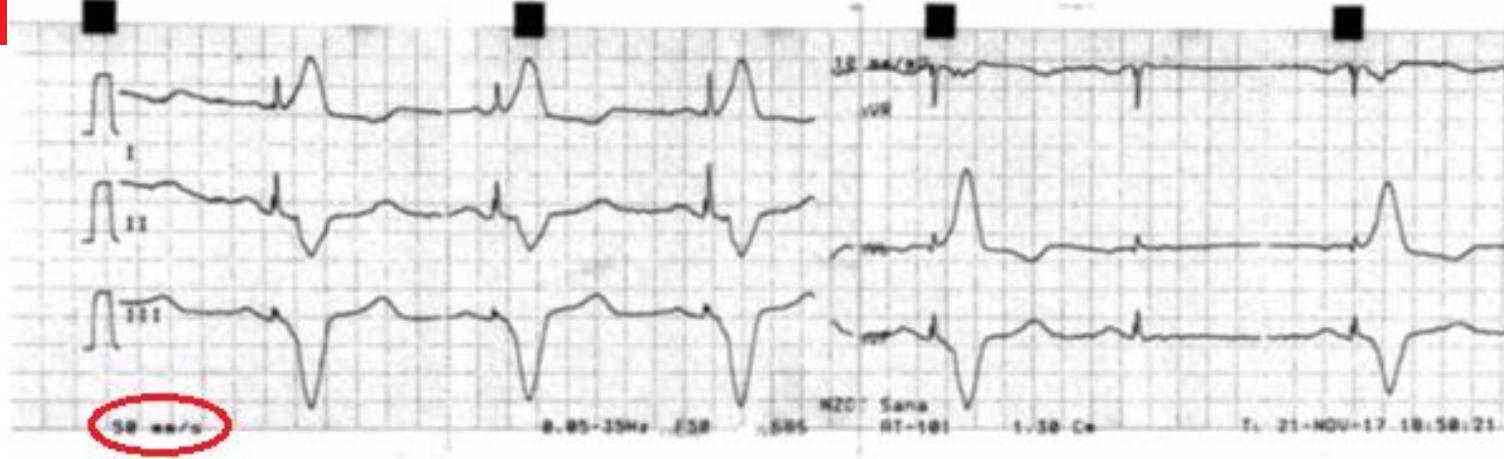

5.3. What is the first line of treatment (BP 70/40 mmHg)?

- A. Beta-blocker
- B. Amiodarone
- C. Defibrillation
- D. Electrical cardioversion

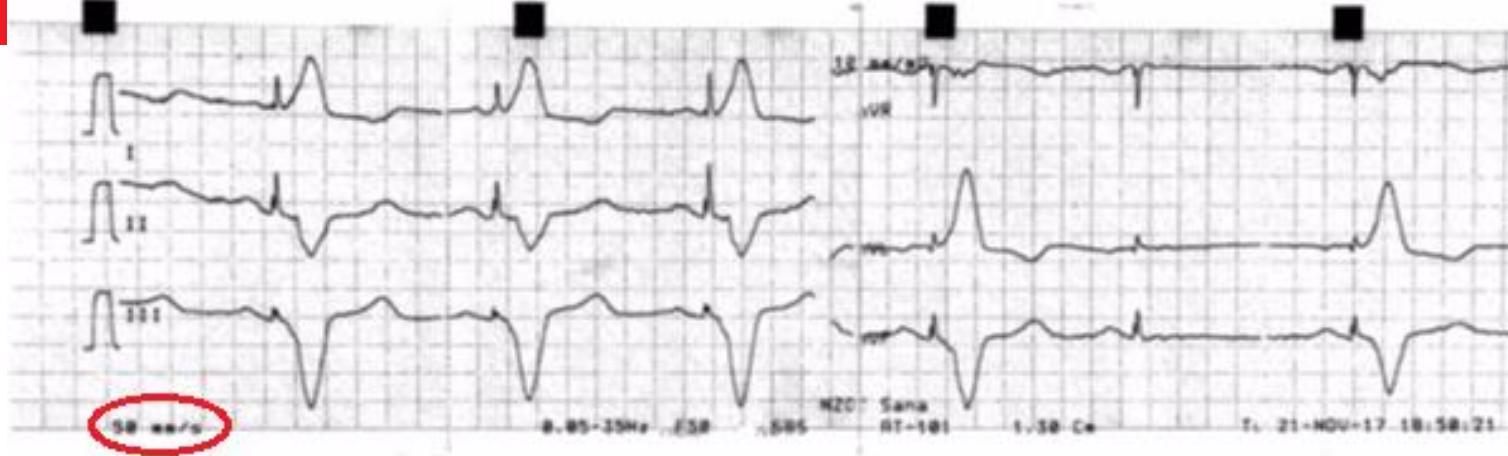

6.1. What is the heart rhythm?

- A. Sinus rhythm
- B. Atrial flutter
- C. Ventricular tachycardia
- D. Atrial fibrillation

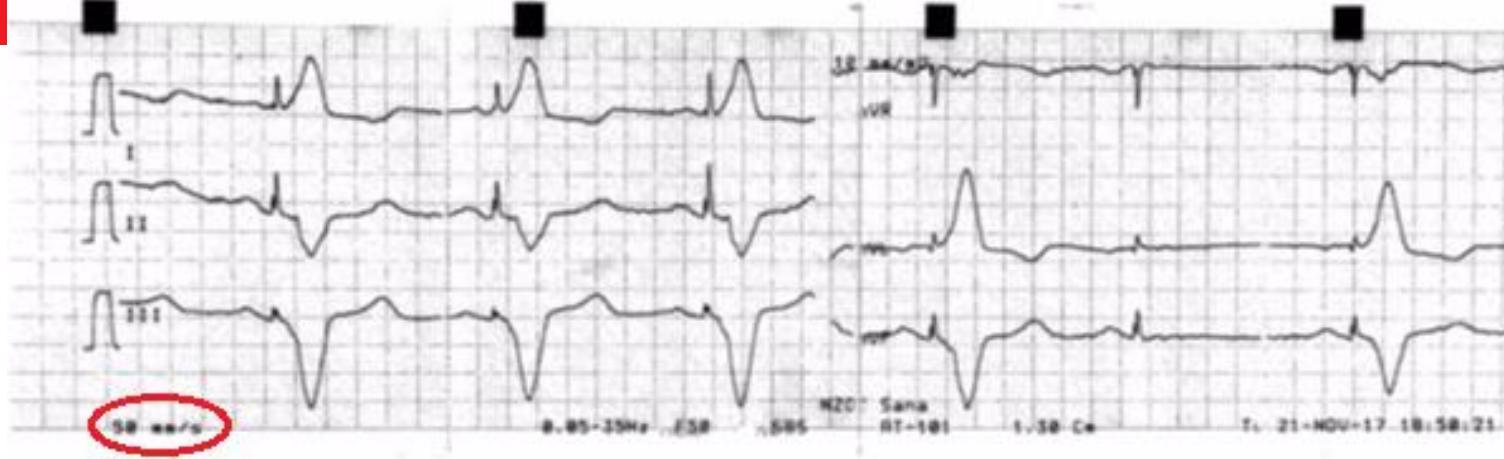

6.2. Why are the wide QRS complexes observed?

- A. Ventricular extra beats
- B. LBBB
- C. RBBB
- D. Pacing

6.3. What type of the pacemaker is implanted?

- A. VVI
- B. AAI
- C. Voo
- D. DDD

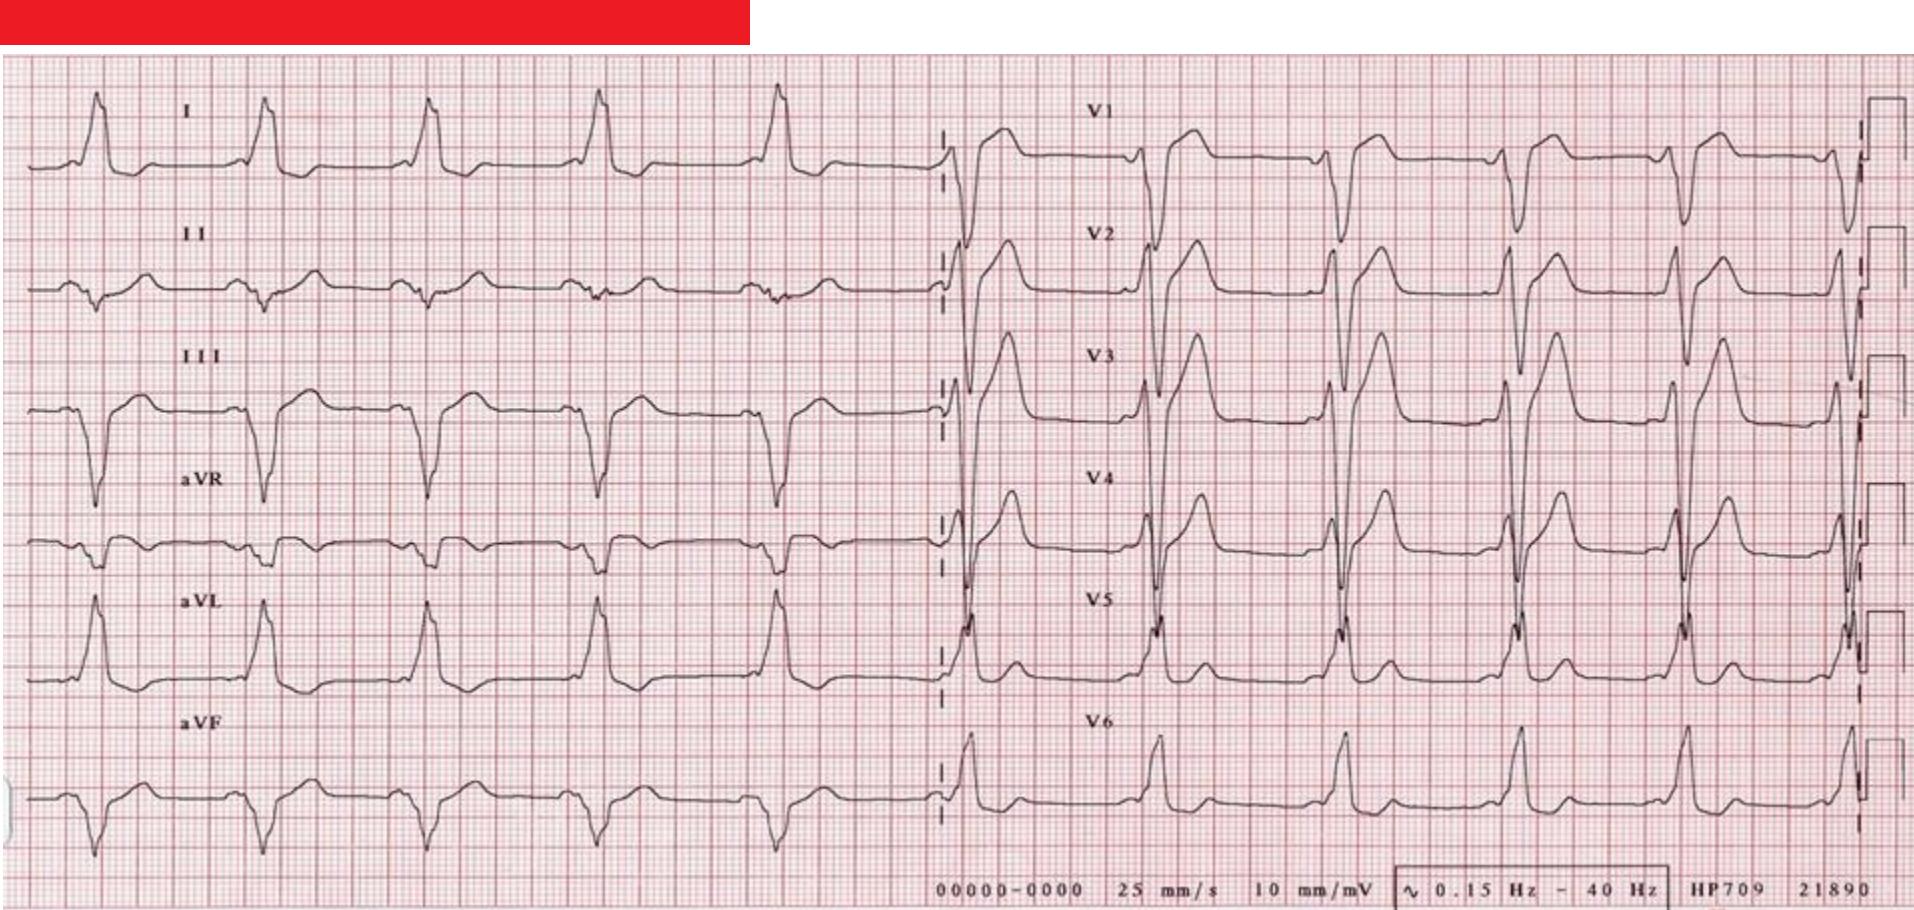

6.4. Are there any problems with pacemaker?

- A. No, everything is ok
- B. Yes, there is problem with pacing
- C. Yes, battery level is low
- D. Yes, there is problem with sensing

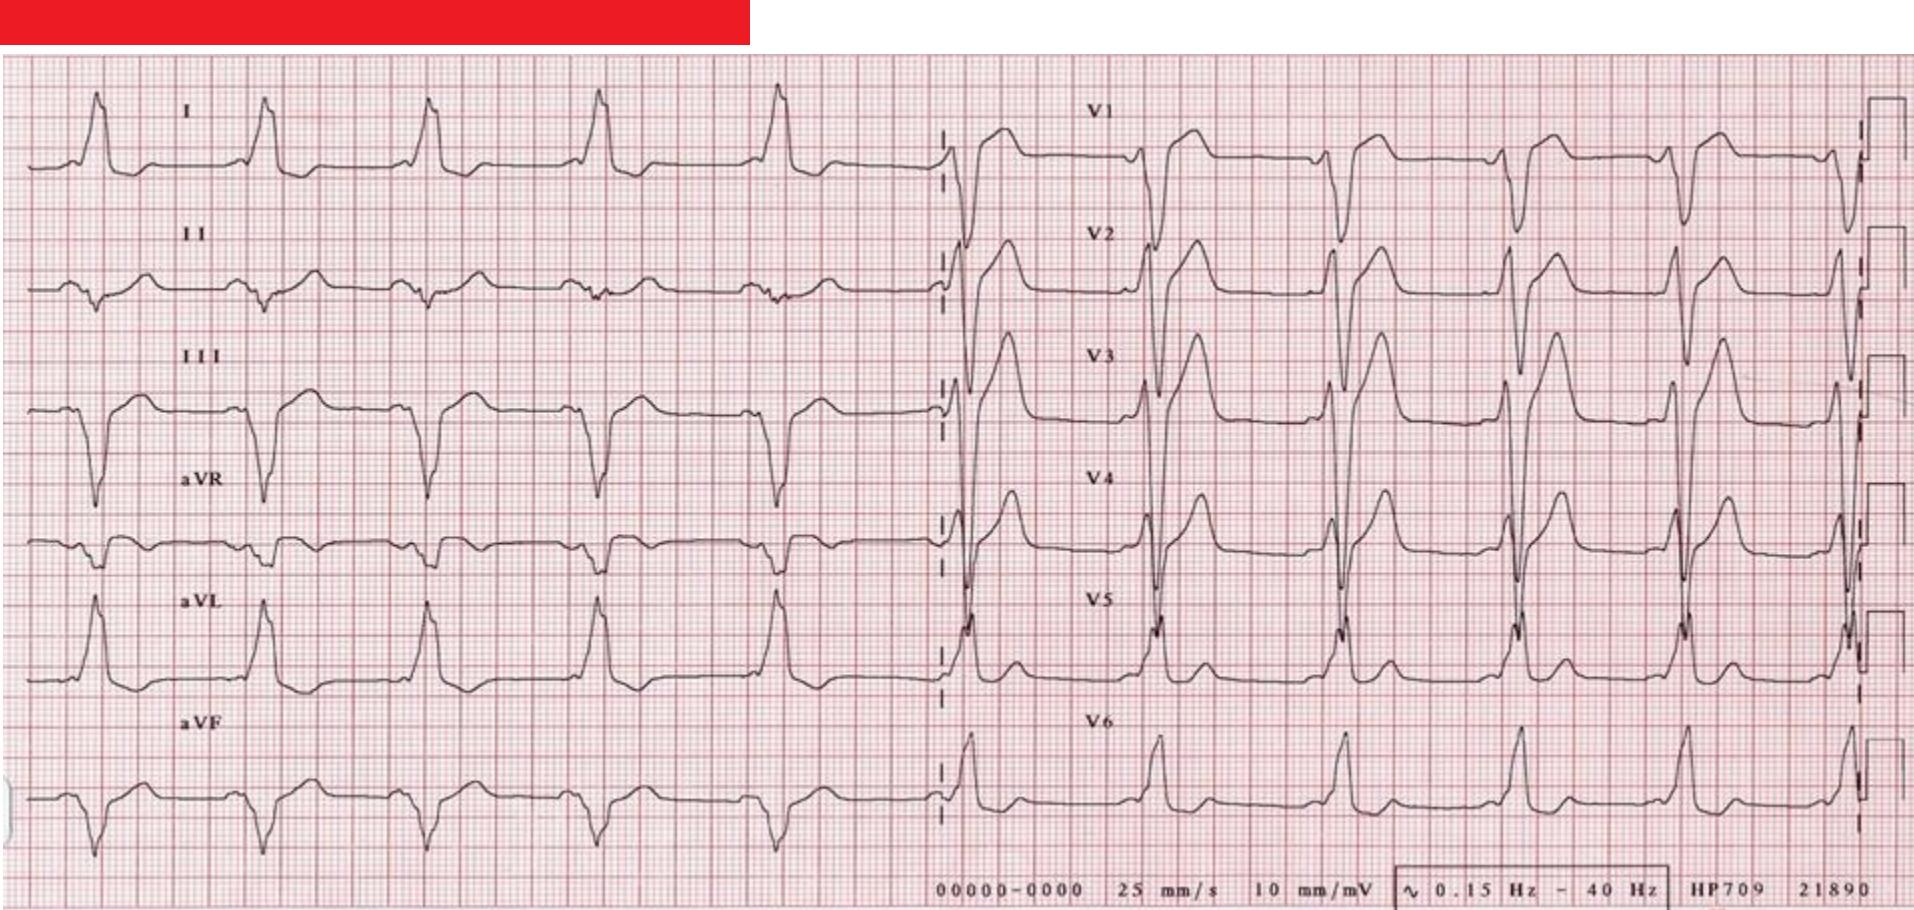

7.1. What is the heart rhythm?

- A. Sinus rhythm
- B. Atrial flutter
- C. Ventricular tachycardia
- D. Nodal rhythm

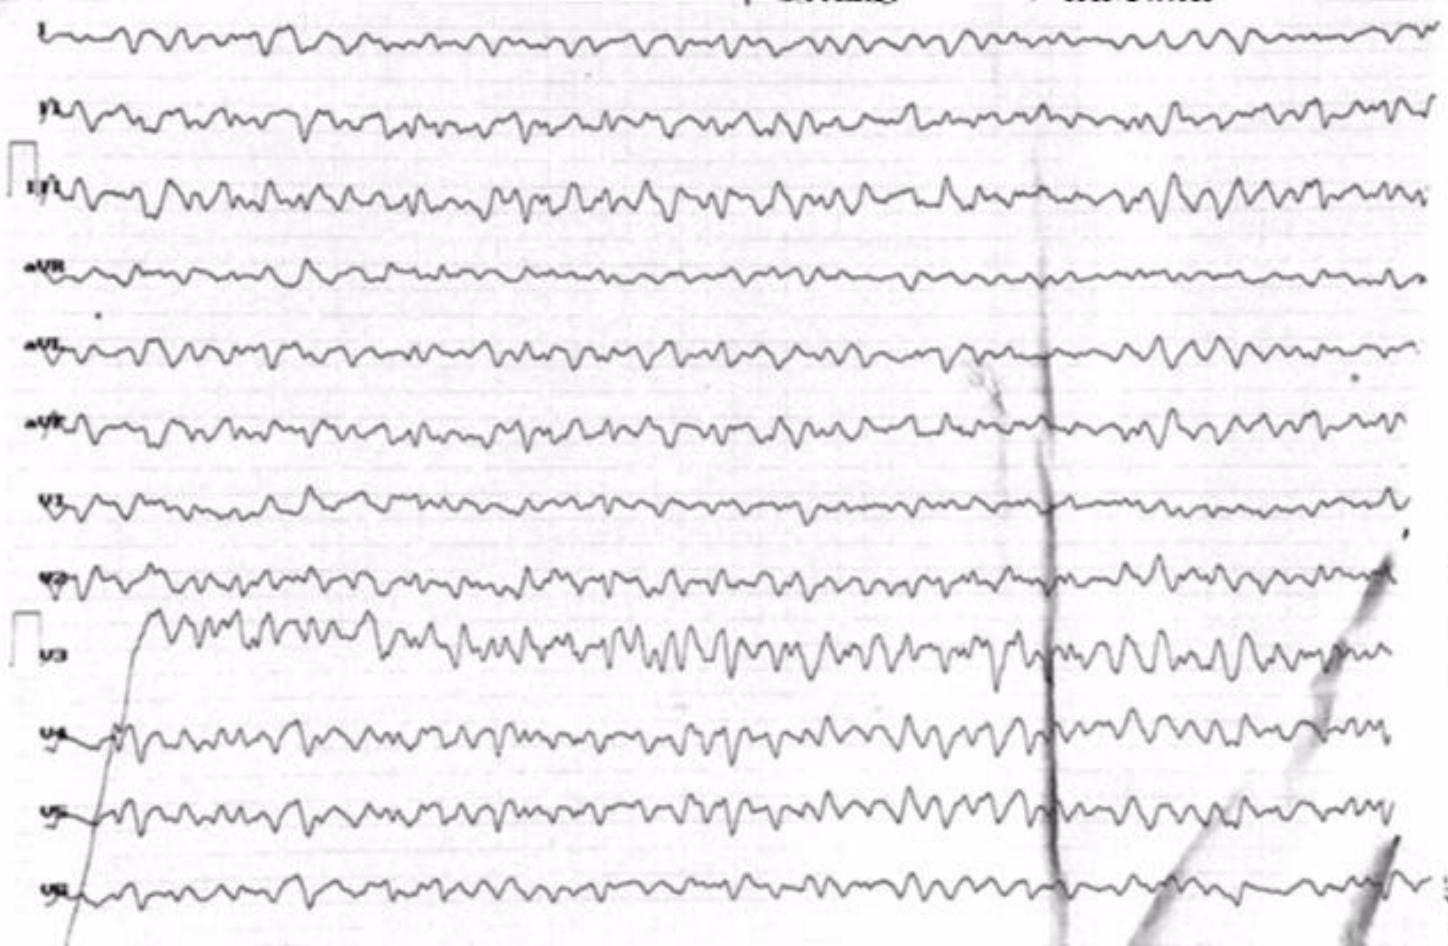

7.2. Why are the wide QRS complexes observed?

- A. Ventricular extra beats
- B. LBBB
- C. Wolf-Parkinson-White syndrome
- D. Pacing

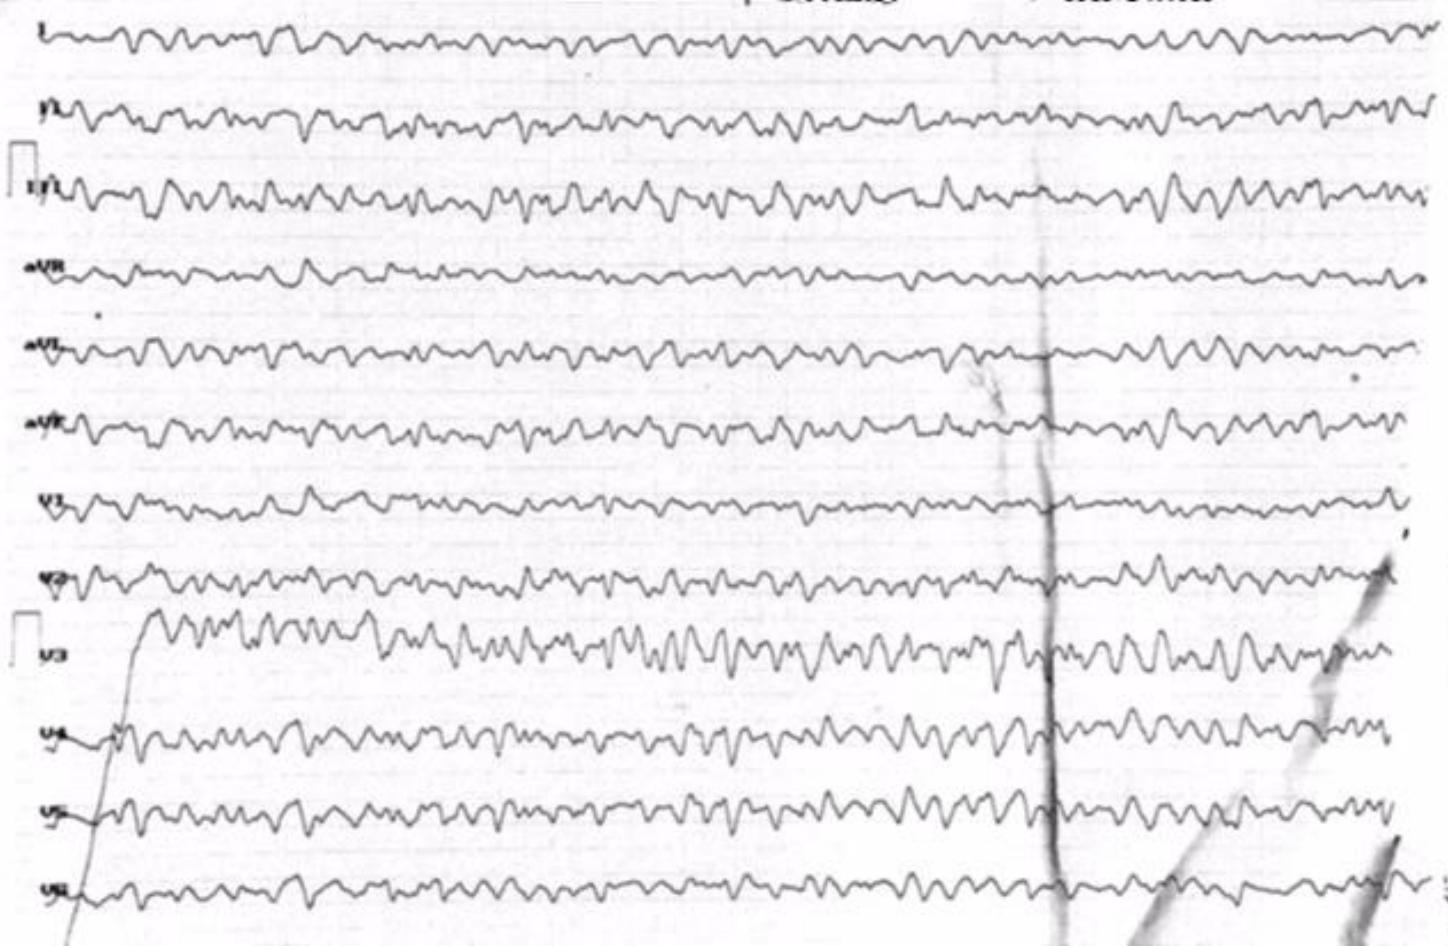

8.1. What is the heart rhythm?

- A. Sinus rhythm
- B. Atrial flutter
- C. Atrial fibrillation
- D. Ventricular fibrillation

8.2. What is the first line of treatment?

- A. Beta-blocker
- B. Amiodarone
- C. Electrical cardioversion
- D. Defibrillation
